ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 – site conditions; paragraphs 2-3 – rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 – site information on waters of the U.S. occurring onsite): The project site is bowl-shaped, encompassed within a single drainage sub-basin, and generally bordered by major roadways on three sides. A thorough analysis of available GIS data by the project manager and the team leader determined that there is no direct or adjacent connection to waters of the United States. The Corps recently did not exert jurisdiction over two other peat mines within the general vicinity of this project. The acreage total on those two projects was over 600 acres.
